comment_content:

Strategic Planning Comments
As a general point LCC welcome the inclusion of monitoring indicators in the section after each policy.

Public Health Comment
LCC Public Health would like to see health related monitoring indicators given consideration.

Officer Comment:

The support is noted.

It is likely that the impact of Local Plan policies and proposals upon health-related indicators will be relatively limited (i.e. the community's health and well-being is influenced by a huge range of factors, with the Local Plan being just one small factor). In these circumstances, the inclusion of health-related monitoring indicators is considered to be unnecessary, and potentially misleading.

Officer Recommendation:

No change to the approach is required.

No change to the approach is required.
